Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-9, drawn to co-deposition catalyst coating method & apparatus.

Group II, claim(s) 10-14, drawn to removing liquid from atomized stream & depositing particles.

Group III, claim(s) 16-17, drawn to coating apparatus having means to convey & nip membrane & porous materials.

Group IV, claim(s) 18-19, drawn to electrocatalyst layer w/ regions of differing permeability.

Group V, claim(s) 20-22, drawn to electrocatalyst or gas diffusion layer having 3 layers.

Group VI, claim(s) 23-25, drawn to proton conducting membrane for fuel cell.

Group VII, claim(s) 26-29, drawn to proton conductive membrane for H₂/O fuel cell.

Group VIII, claim(s) 30-32, drawn to proton conductive membrane for methanol/O fuel cell.

2. The inventions listed as Groups I-VIII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the groups do not bear the technical relationship of combining particle streams comprising catalyst and subsequent co-deposition by impingement to a substrate. The Examiner also points out the technical feature lacks definition of a contribution over the prior art as set forth in the PCT-210 (Singer US 4177159).

3. A telephone call was not made to Alfred Moratori on 3/30/06 to request an oral election to the above restriction requirement, because of the complexity of the issues at hand.

Art Unit: 1762

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Frederick J. Parker whose telephone number is 571/ 272-1426. The examiner can normally be reached on Mon-Thur. 6:15am -3:45pm, and alternate Fridays.

Art Unit: 1762
